

EMMS

Play & Manage Music in Emacs

lgfang

plexus platform

March 7, 2012

提纲

- 1 为什么是Emacs
- 2 基本功能
- 3 定制、扩展与补丁

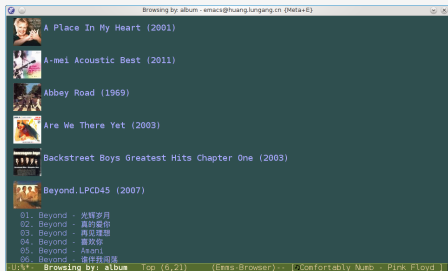

为什么用Emacs管理音乐？

- （我觉得）简洁、实用的界面
- 跨平台
- 无限扩展
- 无限定制
- 其它各种Emacs的便利

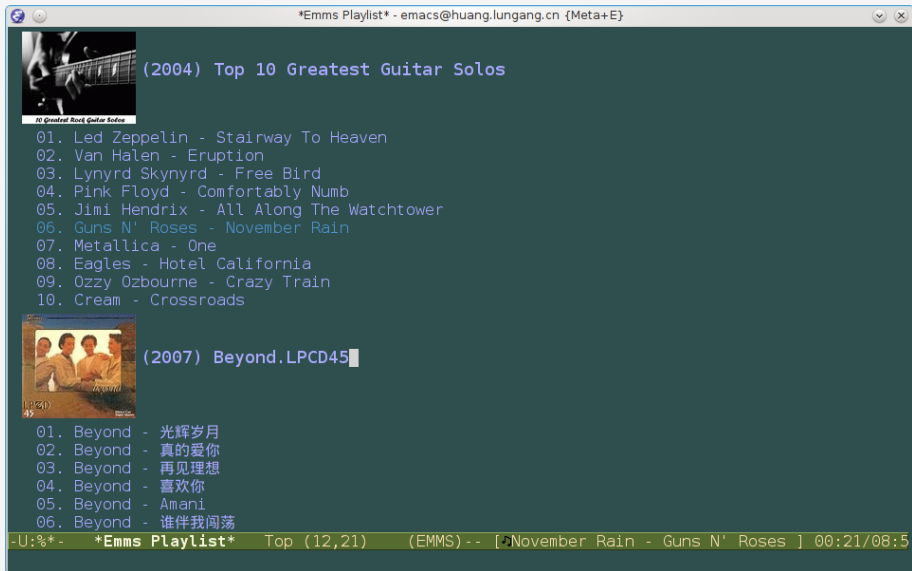

提纲

- 1 为什么是Emacs
- 2 基本功能
- 3 定制、扩展与补丁

分类（专辑、流派等）浏览音乐库

播放列表

同时显示，选歌更方便

独坐在路边街角 冷风吹醒
 默默地伴着我的孤影
 只想将结他紧抱 诉出辛酸
 就在这刻想起往事
 心中一股冲劲勇闯
 抛开那现实没有顾虑
 仿佛身边拥有一切
 看似与别人筑起隔膜
 几许将烈酒斟满 那空杯中
 借着那酒洗去悲伤
 旧日的知心好友 何日再会
 但愿共聚互诉往事
 心中一股冲劲勇闯
 抛开那现实没有顾虑
 仿佛身边拥有一切
 看似与别人筑起隔膜
 独坐在路边街角 冷风吹醒
 默默地伴着我的孤影
 只想将结他紧抱 诉出辛酸
 就在这刻想起往事
 心中一股冲劲勇闯
 抛开那现实没有顾虑
 仿佛身边拥有一切
 看似与别人筑起隔膜
 几许将烈酒斟满 那空杯中
 借着那酒洗去悲伤
 旧日的知心好友 何日再会

没有图形环境照用不误

是一生奉献 肤色斗争中
* 年月把拥有变做失去
疲倦的双眼带著期望
# 今天只有残留的躯壳
迎接光辉岁月
风雨中抱紧自由
一生经过彷徨的挣扎
自信可改变未来
问谁又能做到
可否不分肤色的界线
愿这土地里
不分你我高低
缤纷色彩显出的美丽
是因它没有
分开每种色彩
* 年月把拥有变做失去
疲倦的双眼带著期望
# 今天只有残留的躯壳
迎接光辉岁月
风雨中抱紧自由
一生经过彷徨的挣扎
自信可改变未来
问谁又能做到
# 今天只有残留的躯壳
-- [NP:光辉岁月 - Beyond ] 01:03/05:00
```

提纲

- 1 为什么是Emacs
- 2 基本功能
- 3 定制、扩展与补丁

专辑视图里把年份放在最后（参见前图）

这样专辑视图里专辑就按名称排序，而不是“先年份再名称”排序。

```
(defun lgfang-emms-browser-album-and-year-fmt (bdata fmt)
  (concat
    "%i%cS%n"
    (let ((year (emms-browser-format-elem fmt "y")))
      (if (and year (not (string= year "0")))
          " (%y) "
          ""))))
```

自动下载歌词

```
(when (require 'emms-lyrics-download nil t) (ad-activate 'emms-lyrics-find-lyric))
```

歌名、歌手名中带单引号打这个补丁：

```
*** lgfang/emms-lyrics-download.el~      2010-06-09 23:37:03.000000000 +0800
--- lgfang/emms-lyrics-download.el      2012-01-01 11:42:55.000000000 +0800
*****
*** 36,42 ****
      (let* ((itrack (emms-playlist-current-selected-track))
              (artist (emms-track-get itrack 'info-artist))
              (title (emms-track-get itrack 'info-title))
!              (iartist (replace-regexp-in-string "[,]" "" artist))
!              (ititle (replace-regexp-in-string "[,]" "" title))
              (uartist (http-url-encode iartist 'gb2312))
              (utitle (http-url-encode ititle 'gb2312))
--- 36,42 ----
      (let* ((itrack (emms-playlist-current-selected-track))
              (artist (emms-track-get itrack 'info-artist))
              (title (emms-track-get itrack 'info-title))
!              (iartist (replace-regexp-in-string "[,']" "" artist))
!              (ititle (replace-regexp-in-string "[,']" "" title))
              (uartist (http-url-encode iartist 'gb2312))
              (utitle (http-url-encode ititle 'gb2312))
```

中文的哈希好像有点问题

经常出现专辑不显示的情况，打上这个patch就好了（貌似armarok也有这个问题，不过还是emacs改起来简单）。

```
(when (require 'emms-lyrics-download nil t) (ad-activate 'emms-lyrics-find-lyric))
```

歌名、歌手名中带单引号打这个补丁：

```
*** lgfang/emms-lyrics-download.el~      2010-06-09 23:37:03.000000000 +0800

    (setq emms-cache-dirty nil))
```

同步显示歌词的补丁

同步显示歌词的功能其实用处不大，不过没有好像又有点被人鄙视 :)
，所以我稍微改了改emms源码实现了这个功能：

```
*** /tmp/ediff2397pPj    2010-07-11 23:09:51.000000000 +0800
